ON PROXIMITY @BRUSSELS GALLERY WEEKEND

with Egoo Dallas, TQMIA, Erik Gonzales, WE_ø18_3W, Mirra Markhaeva, Youssef Moukii, Fareed Aziz and Maria Muehombó.

During a long lockdown period, the artistic work and meeting space GLOBE AROMA has used the opportunity to rethink, reorganise and transform its space. In the fall of 2021 Globe Aroma reopened its doors to artists in need of a workspace. More than 30 artists with newcomers' backgrounds have been accommodated in the atelier experimenting together with values such as solidarity, respect and communing (of space, materials and ideas). The atelier functions as a vibrant place where artists from different cultural backgrounds and practices can meet and find a safer place to develop their work in close proximity to each other.

ON PROXIMITY is a celebration of the first year of the atelier. Globe Aroma provides the opportunity to artists currently active in the atelier to collaborate and produce an exhibition celebrating proximity and reflecting together on their collective future. The selected group, led in a series of workshops, discussions and a summer residency is showcasing both their individual work on different media and a collective piece called the "mirrored space", reflecting on notions of a shared home and its effects on art creation.

The exhibition is curated by two of the atelier artists, Fareed Aziz, architect and visual artist and Maria Muehombó, transdisciplinary artist and DJ. The process was documented by Deborah Ephrem, video artist and photographer, as a guest artist.

GLOBE AROMA is an artistic work and meeting place that provides space, time and a network for artists, co-creators and art lovers with a background as newcomers. Globe Aroma supports people who often experience specific challenges in accessing the arts sector and developing artistic practices due to their precarious citizenship status. Globe Aroma therefore builds, in alliance with the Flemish, Brussels and international cultural, educational and migration sectors, a mental and infrastructural interspace in which a community can create, discover and share art with a wide audience.
